### DETAILED ACTION

This action is responsive to applicants' amendment and response received March 1, 2004. Claims 1-4 are currently pending.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsaur et al, US 5,281,355.

Tsaur et al teach a structured liquid detergent comprising up to 30% sodium citrate/nitriloacetate, up to 56% anionic/nonionic surfactant, up to 15% sorbitol, and the balance water (col. 20, lines 40-58). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Applicants have traversed this rejection on the grounds that Tsaur et al make no mention of the surfactant, water and electrolyte being present in relative proportions adapted to form a flocculated, dispersed, structured, surfactant system. The examiner

maintains that as Tsaur et al teach structured detergents, the components must be present in proportions sufficient to form said structured detergent. Accordingly, the rejection is maintained.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsaur et al, US 5,281,355.

Tsaur et al are relied upon as set forth above. The specific proportions of components set forth in present claim 4 are not taught by Tsaur et al, however, as these proportions are overlapped by the teachings of the reference, it would have been obvious to one of ordinary skill in the art to prepare a structured detergent which meets the limitations of present claim 4 based on the teachings of Tsaur et al.

Applicants have traversed this rejection on the grounds that Tsaur et al make no mention of the surfactant, water and electrolyte being present in relative proportions adapted to form a flocculated, dispersed structured surfactant system. The examiner maintains that as Tsaur et al teach structured detergents, the components must be

present in proportions sufficient to form said structured detergent. Accordingly, the rejection is maintained.

Applicants have traversed the remaining art rejections on the grounds that these references do not teach structured detergents. Although the references cited teach all the components of applicants' invention, the examiner acknowledges that the term "structured" is art-recognized as referring to a relatively narrow scope of detergents with specific properties. Accordingly, applicants' argument is persuasive and these references are withdrawn.

#### ***Allowable Subject Matter***

2. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
